For Consumers, Patients & Caregivers

**Confused about Cannabis?
You're Not Alone. We're Here to Help**

- “What is the difference between cannabis, hemp, and marijuana?”
- “Do I have to get high or smoke to get relief?”
- “How do I know what's safe?”
- “The label is confusing. How do I read it?”
- “Will it interact with my medications?”
- “How can it help my symptoms?”
- “Do I need a Medical Card?”

**LEAF411 nurses will answer your questions with
easy-to-understand information so you can:**

- Understand cannabis basics
- Learn about the parts of the plant (THC, CBD, CBG, etc) and how they may affect your symptoms
- Get trusted answers about how cannabis may affect your health
- Make informed decisions with support from medical professionals

Why LEAF411?

- Founded by nurses
- Rooted in science
- Focused on patient education
- First national cannabis nurse helpline

*The American Nurses Association (ANA) now
recognizes Cannabis Nursing as a nurse specialty.*

LEAF411's mission is to provide education and directional support to the general public about the safe and effective use of legal cannabis (marijuana & hemp). Our team of cannabis-trained nurses are passionate about helping communities access balanced education about legal cannabis use.

Cannabis Nurse Guidance Services

A national nonprofit helping you navigate cannabis and hemp with confidence and compassion

At LEAF411, we believe that knowledge is power—especially when it comes to the safe and responsible use of legal cannabis.

In today's digital world, many individuals turn to the internet to self-diagnose and manage their health, including cannabis-related care. However, this approach can be risky. Most dispensary staff—such as budtenders—are not medically trained to provide education and guidance on complex health issues. With the overwhelming number of cannabis and hemp products on the market, combined with aggressive marketing and inconsistent product quality, consumers are often left confused and unsure of what's truly safe or effective. That's why access to trustworthy, evidence-based information is more important than ever.

LEAF411 nurses are trained in cannabinoid sciences and can help healthcare consumers get started in the right direction with the appropriate products for safe use.

Katherine Golden, a Registered Nurse with over 28 years of service in the medical community, has been a pioneer in the field of cannabis nursing for the past 9 years. As the CEO, Executive Director & Founder of LEAF411, she has been instrumental in shaping the industry. Katherine has ensured the entire LEAF411 team of licensed professionals has advanced training in cannabinoid therapeutics through reputable courses, certificates, and programs designed to equip healthcare professionals with the knowledge and skills needed to understand and integrate cannabis into patient care. Additionally, she is the CEO and Founder of the Leaf Nurse Network, she serves as a cannabis Clinical Director for the state of Maryland, she is a cannabis Nurse Consultant, and a cannabis Nurse Care Coordinator for the Colorado Department of Labor and Employment, Workers' Comp Division. To stay up-to-date with the latest science and current issues, Katherine is an active member of the Cannabis Nurse Network, Society of Cannabis Clinicians, S3 Medical Advisory Committee, and follows numerous cannabis-related patient and professional advocacy groups.
